**DETAILED ACTION**

Claims 3-5, and 39 are pending.

Upon review and reconsideration, the following claims are subject to species election.

***Election/Restrictions***

This application contains claims directed to the following patentably distinct species of the claimed invention which differ at least in etiology, pathology, and mechanisms:

- a) inflammatory or autoimmune condition atherosclerosis (Claims 4 & 5)
- b) cancer growth or cancer metastasis (Claims 4 & 5)
- c) dysfunctional secretion of insulin in NIDD (Claims 4 & 5)
- d) glucose-induced oxidative stress (Claim 4)
- e) development of end-organ dysfunction or damage (Claim 4)

Additionally, claim 39 is generic to a plurality of disclosed patentably distinct species comprising the following distinct tissue specimens or cell types:

- a) vascular smooth muscle cells
- b) adrenal cells
- c) endothelial cells
- d) monocytes
- e) pancreas tissue
- f) breast tissue

Art Unit: 1642

g) renal tissue

h) tumor

The above species represent separate and distinct cell types with different morphologies and functions such that one species could not be interchanged with the other. As such, each species would require different searches and the consideration of different patentability issues.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 4-5, and 39 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the

examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Gary B. Nickol Ph.D. whose telephone number is 703-305-7143. The examiner can normally be reached on M-F, 8:30-5:00 P.M..
